Education

Degree	Institute/Board	CGPA/Percentage	Year
M.Tech (Operations Research & Data Analytics)	Indian Institute of Technology Kharagpur (IIT KGP)	-	2026 - 2028
B.Tech (Mechanical Engineering)	Madhav Institute of Technology & Science (MITS), Gwalior	**7.91/10**	2022 - 2026

- **Relevant Coursework:** Data Analytics, Statistics, Decision Modeling, Operations Research, Recommender Systems, Software Engineering and Management, Optimization, Linear Programming

Internship Experience

- **Tata International Ltd.** *May 2025 - Jun 2025 (4 Weeks)*
  Industrial Safety Internship Dewas, Madhya Pradesh
  - Worked on the project *"Identifying Potential Hazards & Their Engineering Solutions at Tata International Limited"*
  - **Assessed** hazards across **16** leather-processing operations, **recommending** engineering controls such as machine guards, interlocks and ventilation systems
  - **Evaluated** safety risks across **3** industrial boilers, focusing on pressure control, fuel leakage and electrical safety
- **Dandraua Dhaam Private Limited** *Mar 2024 - Apr 2024*
  Inventory Management Intern Gwalior, Madhya Pradesh
  - Completed an internship as Inventory Management Intern
  - Worked on **inventory tracking and management** processes
  - Gained practical exposure to inventory-related operations and developed understanding of **supply chain and inventory control**

Projects

- **Retail Sales & Customer Analytics Dashboard** *Oct 2026*
  Python, Pandas, SQL, Power BI, Excel GitHub
  - **Cleaned and transformed** retail datasets using **Python and Pandas** to prepare data for business analysis
  - **Used SQL** and **exploratory data analysis** to investigate sales trends, customer behavior, product performance and revenue patterns
  - **Developed** a **Power BI dashboard** to visualize key performance indicators and support data-driven business decisions
- **D2C Order Follow-up Automation** *Sept 2026 - Oct 2026*
  Python, Streamlit, Pandas, SQLite GitHub
  - **Developed** an automated order-monitoring system using **Python, Pandas, Streamlit and SQLite** to validate **CSV/Excel** data and identify order-processing exceptions
  - **Implemented 5** rule-based exception checks covering unconfirmed orders, dispatch delays, shipment delays, failed deliveries and high-value overdue orders
  - **Built 5** functional modules for monitoring, task management, reporting and audit tracking, with duplicate-task prevention and automatic task resolution
- **Inventory Management & Tracking System** *Oct 2026*
  Python, Django GitHub
  - **Developed** a **Django-based** inventory application supporting product and category management, stock tracking and inventory record management
  - **Implemented** low-stock alerts for items below **10 units**, out-of-stock detection and search/filter functionality
  - **Built** dashboard metrics for inventory valuation, potential sales revenue and category-wise stock distribution; tested using sample data covering **15** products across **5** categories

Technical Skills

- **Programming & Querying**: Python (Intermediate), SQL (Intermediate), NumPy (Intermediate), Pandas (Intermediate)
- **Data Analytics & Visualization**: Data Cleaning & Analysis, Exploratory Data Analysis (EDA), Data Visualization, Excel (Intermediate), Power BI (Beginner), Matplotlib / Seaborn (Beginner)
- **Core Concepts**: Statistics, Operations Research, Optimization, Linear Programming, Decision Modeling, Data Analytics & Business Insights
- **Tools & Others**: Jupyter Notebook, VS Code, Git & GitHub
- **Currently Learning**: Machine Learning, Advanced SQL

Academic Achievements

- **GATE 2026**, **All India Rank 1310** (Mechanical Engineering) *2026*
- **BARC**, **Qualified** BARC CTC *2026*
- **NPTEL**, **NPTEL Star** achieved **2 times** *2026*
